Professional Summary

Senior pursuing a B.S. in Computer Information Systems with hands-on experience in software development, systems design, and data-driven applications. Proven ability to design, build, and improve scalable, reliable systems with a focus on performance, usability, and long-term maintainability. Comfortable working across the full development lifecycle, from requirements and design through implementation, testing, and continuous improvement.

Demonstrated leadership in high-responsibility environments through residential life and program coordination roles, where accountability, clear communication, and sound decision-making are essential. Known for a strong work ethic, discipline, and consistency, with the ability to take ownership and deliver results in fast-paced environments. Approaches work and leadership with integrity and a service-oriented mindset, valuing teamwork, respect, and doing things the right way.

Motivated to grow as a well-rounded professional and leader by contributing to impactful work while continuing to develop technical depth, strategic thinking, and leadership skills grounded in integrity and service.

EMPLOYMENT

Residential
Assistant

Baylor University Talent Identification Program (Baylor TIP)

📍 Waco, Texas, United States 📅 June 2025 - July 2025

- Led and supported a diverse group of gifted students, fostering both academic and personal growth through individualized guidance and mentorship.
- Designed and facilitated engaging activities and community events that encouraged teamwork, creativity, and a positive residential culture.
- Managed and resolved student conflicts with empathy and professionalism, maintaining a safe and inclusive living environment.

SKILLS

- **Programming Languages:**
C++, C#, Swift (SwiftUI), HTML, CSS, React, JavaScript
- **Development Tools & Platforms:**
GitHub, Firebase, Xcode, VScode
- **Technical Concepts:**
Object-Oriented Programming (OOP), Client-Server Architecture, Authentication Systems, Data Modeling, Agile/Scrum Methodologies
- **Systems & Software Practices:**
Application Architecture, Debugging & Testing, Code Documentation, Version Control, Process Improvement

LEADERSHIP & COMMUNITY INVOLVEMENT

- Residential Life Leadership (SWU & Baylor TIP)
- Fellowship of Christian Athletes – Community Outreach & Mentorship
- NCAA Division II Cross Country & Track & Field Student-Athlete

- Collaborated with staff to ensure smooth daily operations and uphold the program's educational and behavioral standards. Served as a role model for academic integrity, responsibility, and respect, helping students navigate challenges away from home.

Cashier, Starbucks Barista, Guest Services, Drive-Up, Cart Attendant

Target

📍 *Brandon, Florida, United States* 📅 *2020 - 2022*

- Delivered exceptional customer service across multiple departments, including front end, Starbucks, guest services, and drive-up.
- Managed fast-paced shifts during peak hours while maintaining accuracy, composure, and a positive guest experience.
- Collaborated with team members to resolve customer issues quickly and efficiently.
- Balanced a 40+ hour work week while being a full-time student-athlete, demonstrating reliability, time management, and strong work ethic.

EDUCATION

Southern Wesleyan University | Bachelor of Science - BS, Computer Information Systems.
Minor: Business Administration

📅 *August 2022 - May 2026*

PROJECTS

Just Bean It – Mobile App (SwiftUI, Firebase)

Personal Software Development Project

- Designed and developed a SwiftUI-based mobile application enabling users to discover, rate, and save local coffee shops
- Implemented secure user authentication and real-time data storage using Firebase
- Architected scalable UI navigation and modular components to support future feature expansion
- Emphasized clean code structure, maintainability, and performance optimization
- Applied Agile-style iteration and continuous improvement throughout the development lifecycle

CareerFlow Website (React JS, Firebase)

Personal Software Development Project

- Built a fully responsive web application from scratch to help users organize and track job applications through a visual workflow system.
- Developed the frontend using React.js to manage applications across stages such as Applied, Interview, Offer, and Rejected.
- Implemented Firebase Authentication and Firestore to securely store and manage user application data in the cloud.
- Designed a clean, responsive interface optimized for both desktop and mobile devices.
- Focused on usability, clear data organization, and performance to create a practical tool for managing the job search process.
